

MENding Hearts

Supporting families affected by
Meningococcal / Meningitis

MENINGITIS CENTRE AUSTRALIA

Meningitis Centre Australia launched MENding Hearts in July 2021. This initiative has been developed by parents with lived experiences of Meningitis, Meningococcal and related diseases. The aim of MENding Hearts is to provide support for survivors and families of loved ones affected by these diseases.

MENding Hearts Support Group

MENding Heart's first project is an online support group. The MENding Hearts Support Group is a place for survivors and families of loved ones affected by Meningitis, Meningococcal and related diseases to connect, share and talk in a private and supportive environment.

To become a member of [MENding Hearts Support Group – A Meningitis Centre Australia Initiative](#) follow this link to Facebook, request to join and answer all 4 questions. An administrator will review your answers and link you to the group.

Please note: Only Australians will be admitted to this closed Facebook group. If you are not Australian, please visit [CoMO](#) to find a Meningitis Organization near you for support.

(Insert photos of MENding Hearts parents here or a collection of photos including parents and survivors not already on the website)

To hear about future MENding Hearts projects, follow Meningitis Centre Australia on your preferred social media platform; [Facebook](#), [Instagram](#), [Twitter](#), [LinkedIn](#) and check back with this webpage.
